

# video conferencing

Be anywhere and everywhere without leaving your office.

## Time and time again.

You have to be everywhere, and be everything to everyone. Sometimes it can seem like an impossible task, especially dealing with several offices in several different parts of the country, or all over the world.

From 200" dual screen giants to systems designed for personal workspaces, we have all sizes and configurations you need to suit your high demands. Let SpaceAge Communications work out which system is right for you. Finance is available or can be arranged.

## Videoconferencing

Videoconferencing provides the most effective form of communication. It offers users the chance to read and respond to body language and visual cues as well as vocal inflections and tonal stresses.

SpaceAge Communications can help you to get your message across and understand the situation, without compromise.
